SOLUTIONS GROUP

Brewery Chillers

Precise temperature control for
your brewery.

Our focus is to produce the right chiller solution for brewers who demand as much from their equipment as they do their brew.

Oceania Solutions Group is an Australian owned business that focuses on providing engineered HVAC solutions. We value the importance of relationships with our clients and partners. Our team enjoy collaborating and solving complex 'design and construct' projects for your business with our product solutions.

Our products are rigorously tested and certified, meeting Australian and New Zealand standards and regulations.

Oceania Solutions Group are proud of our extensive portfolio and experience within the brewery industry. Partnering with our global suppliers we provide a comprehensive product and service package solution to support breweries throughout Australia and New Zealand.

We understand that brewery chillers require lower and more accurate temperature control than a standard comfort cooling chiller. This is why we provide a variety of low temperature options including the ability to run in ambient temperatures down to -6°C .

Our partners are global leaders in chiller technology with a proven track record spanning over 30 years. To support our range, Oceania Solutions Group have trained in-house specialists offering a complete service, from equipment selection and quotation to on-site commissioning with after sales back up.

Our brewing experience ensures we focus on precise temperature control for your product and our service team ensures we provide you with the technical support and expertise to maximise the glycol process chiller operation.

“As a new brewery in the industry, the expertise and knowledge of the Oceania Solutions Group team has been invaluable in the setting up of our brewhouse. Their recommendations on getting the best out of their chiller units and using them to capacity, while considering our planned growth and future requirements has been beyond impressive.”

Oceania Solutions Group Chillers

Our glycol chiller range are engineered and designed to operate effectively and efficiently in sub-zero chilled water supply applications.

The chillers are supplied complete with high level interface controls. This is ideal for monitoring the temperature with a dedicated low temperature kit for the evaporators and monitoring of control supply water temperature, thereby preventing freezing.

The scroll chillers are designed to ensure a constant supply of chilled water for applications such as breweries, wineries and process plants.

All of our chillers are factory tested and can be supplied with an option for dual chilled water pumps, expansion vessels and buffer tanks to provide the most economical and compact package design for your plant configuration and space.

WING

Match your chiller with the perfect partner, a WING Air Curtain.

Keep your patrons comfortable and save on heating and cooling operating costs. WING Air Curtains provide an air barrier that separates areas to maintain comfortable temperatures in venues.

This barrier also prevents most dirt, germs and insects from gaining access into rooms and buildings. This is particularly important for doorways with high traffic walk through, areas that attract a large amount of insects and flies, or at times of increased risk of bacteria and viruses in the air.

Venues such as breweries, wineries, cafes and restaurants are enjoying the cost savings as air temperature stays consistent, providing effective reductions in air exchange through open doors and have low running costs for owners.

Quiet operation, easy installation and maintenance all packaged up in a stylish design. Contact Oceania Solutions Group for a simple, obligation free quote for your venue.

Purchase 24/7 at our online store. Visit

Three size options that can be combined in any configuration.

Available in ambient, water and electric options.

Case studies

Balter Brewery

Balter Brewery can be found in sunny Currumbin, Queensland, inside the spacious warehouse style set up with plenty of brick, concrete, copper pipes.

Since starting out in March 2016, Balter have won a bunch of awards. Most notably, they took out Best International Pale Ale at the AIBA Awards in 2017, Champion Medium Size Brewery and Best Newcomer.

Jetty Road Brewery

Tucked away in the heart of Dromana on the Mornington Peninsula in Victoria, Jetty Road Brewery opened their doors to the public in December 2017, and haven't looked back.

Owned by six local lads, with a passion for all things beer, locally sourced produce and time spent with friends, Jetty Road Brewery will open their brewhouse in October, bringing production onsite.

Fury & Son Brewery

Fury & Son Brewery is located in Keilor Park, Victoria amongst an industrial estate off Keilor Park Drive.

The large commercial set up contains 4 x 5000L fermenters and 4 x 10,000L fermenters. Fury & Son is a father and son operation, who have been brewing beer in one way or another for the better part of 15 years.

Newstead Brewing Co

Newstead Brewing Co opened in March 2017 in Brisbane, Queensland, offering an artistic flair that gives the site a tranquil, comfortable vibe with lashings of industrial robustness.

100% Brisbane brewed with a core range of six beers and a cider, Newstead Brewing Co showcase a sophisticated level of automation which allows the brewers to ramp up production while still being intimately involved in every detail of the brew.

Hemingway's Brewery

Opened in tropical Cairns, Queensland in June 2018, Hemingway's Brewery Cairns Wharf is a heritage listed venue located at the cruise liner terminal in Cairns with views across Trinity Inlet.

A newer and much larger venue with ten times the brewing capacity of its Port Douglas sister venue, Hemingway's Brewery, Cairns Wharf boasts a 19 metre long bar and 20 taps that will offer at least 10 Hemingway's brewed beers, guest beers, and ciders.

Noosa Brewing Company

Noosa Brewing Co. was dreamt up over a couple of beers, by two brothers in 2011.

Opening in 2018, Noosa Brewing Co is nestled in the heart of Noosa, decked out with impressive stainless steel, made to surround you. Feel like you're a part of the action with front row seats to the brewery in the Taproom and kitchen, where people come for the beer, and stay for the good times...
